

SEDA Conference 2021: Chat record Day 2

18:05:29 From David : Q&A Questions in here please!

18:10:29 From Glo Lo : Word Cloud Q: What will be the most important issues in ecological design in the next 10 years? <https://www.menti.com/18ep2gujpt>

18:12:12 From Vas.Piyasena : education

18:12:42 From David : Click on the pentameter link if you need to know where to go

18:12:47 From David : Mentimeter!

18:15:04 From Glo Lo : You can still enter answers if you have not done it yet :

18:15:04 From Glo Lo : Word Cloud Q: What will be the most important issues in ecological design in the next 10 years? <https://www.menti.com/18ep2gujpt>

18:19:58 From Christopher Stewart : Everyone - please chat and ask questions

18:20:54 From David : Q&A for James and Amelia: what was the least necessary use of plastic you found we could all manage without?

18:20:59 From Janice Foster : Great presentation Amelia; it's incredible to see how the screening of one film has led to such big - positive - changes!

18:21:34 From David : Surfers Against Sewage are great

18:21:35 From Ninian Stuart : really inspiring story, beautiful to hear it from a real family in a real place. great story-tellers too 🙏

18:22:42 From David : Brilliant work James and Amelia!

18:23:23 From Vas.Piyasena : This is fantastic ! well done Amelia & James.

18:23:38 From Liz McLean : Q for Amelia and Jamie - did you approach any supermarkets and if so, how did you get on?

18:24:29 From Gail Halvorsen : Q&A great work. are you approaching high schools too? with the same success?

18:24:57 From David : Love the tiffin box idea

18:25:29 From Janice Foster : Q: Which restaurants do tiffin boxes?

18:29:38 From PETER WELSH : Fantastic! What a wonderful effort!

18:29:51 From s halliday : Amelia/ James.. and inspiration.. thank you. Sand

18:31:26 From Ninian Stuart : Earlier reference to Howard Liddell reminded me that the Childrens Plmt (of which he was a founder member) was involved in an eco-city project with children in Dunfermline in 2010 Q i wonder if that helped sowed any of the seeds behind the initiative? <https://www.childrensparliament.org.uk/our-work/past-work/ecocity/>

18:45:28 From David : More Q&A questions in here please!

18:45:43 From Ninian Stuart : beautiful very touching and pertinent to now - as then

18:46:16 From David : Fantastic achievement in The Lost Woods. More details at the end

18:55:54 From David : Questions for Kim here please...

18:58:43 From Janice Foster : Q for Kim: Is the amazing work you're describing all led by community/grassroots organisations, or is there government policy to support it?

18:58:57 From David : Q&A for Kim: can you tell us some specific projects with communities you've worked with that we can look up?

19:01:18 From Liz McLean : Q for Kim: could you give the link to the Lancet article you mentioned, please? Our community garden is on land owned by the NHS and doesn't have long term security.

19:02:16 From David : Q&A for Kim: any really good policies on greenspace and growing in Wales that we could be applying here in Scotland?

19:06:14 From David : Thanks Kim. I'll have to pick your brain on plants!

19:16:47 From kimstoddart To David(privately) : Hi David. I've just emailed you the Lancet article and a link to some Backyard Biodiversity videos in case that's useful. Kim

19:19:01 From Gail Halvorsen : Chris do the filters in MVHR get rid of all the pollutants

19:21:05 From Chris Morgan : Gail, depends on the filter type - finer ones get rid of more but clog up easier. Even best ones don't get rid of everything. You can choose filters to suit what you might be sensitive to.

19:22:48 From Gail Halvorsen : thanks

19:22:58 From Ian Parsons : Gail, many people benefit from pollen filters. Ian

19:23:12 From Ninian Stuart : before his time

19:27:29 From kimstoddart : Hello everyone. Here is a link to some videos I have made for Nature Partnerships on Backyard Biodiversity.<https://www.youtube.com/channel/UC1YX3dypOwgiJuGGheiBliA>. I also have fact sheets please email me kim@greenrocketcourses.com for a copy. We also have a Garden Organic representative in Scotland working in the same way as me to support groups, projects and developments so feel free to email me if you would like details. Thanks. Kim

19:27:31 From David Somervell : Q for @Chris - Any views on electrostatic filters in MVHR - I've seen them in the indoor air source heat pumps

19:28:51 From David : Any more questions for all the live speakers today, please get them in during Tomas' presentation

19:33:19 From Janice Foster : Nice reference here to the risk of 'dropping the green baton' through different stages of a project

19:33:25 From Chris Morgan : No experience of these David, sorry!. Have read about positive ionisation of air movement in esp. metal ducts but I don't know much about the solution apart from negative ionisers which I'm not 100% sure about.

19:36:14 From David : Q&A for Tomas: what are the items that the surveyors and contractors like to push up the costs on, but you have 'found ways round them', while maintaining the (health, green) standards? And how did you do it?

19:39:00 From Christopher Stewart : Question for Tomas - how could you get a health EPC

19:39:22 From Janice Foster : Q for Tomas: What recent knowledge is there on the cocktail effect of the '2300 new annual neurotoxins' on human health?

19:42:05 From jonathanratter : Q & A for Tomas: the building biology literature that I have seen stresses avoiding electromagnetic pollution, including ring mains. This is difficult to achieve, particularly with modern lifestyles. How important do you think that the issue is?

19:47:39 From David To Christopher Stewart(privately) : Might have to not let him run on too much longer, maybe a nudge after a couple of minutes?

19:57:44 From David : Thoroughly agree Amelia. No-one needs another plastic bag!

19:59:38 From s halliday : If anyone has not seen Underkastelsen yet then please look it out. It really elucidates Tomas's point.

20:01:35 From Chris Morgan : Need to go. Very much enjoyed this, thank you to all the other speakers, also Dave and Chris for organising!

20:02:08 From David : Cheers Chris!

20:03:51 From s halliday : Quite often we have to look further afield.. The Biotope Factor is used for planning in Germany and in Sweden...

20:04:44 From Nick Domminney : Kim: any views/lessons from Todmorden Incredible edible? Are there other examples?

20:05:09 From Catherine Cosgrove : The Wellbeing of Future Generations Act in Wales is the key policy. Every new planning application for projects of a certain size has to shown how they meet these standards. The same goes for any project that receives public funding.

20:05:21 From Ulrich Loening : Thank you Chris and all. I'm sorry I have to leave now, actually to prepare a talk on climate and offsetting for tomorrow

20:06:02 From David : Thanks Ulrich!

20:07:45 From David : Well done for speaking to the big guys as well though James and Amelia. You'll shame them into doing better if everyone else does it.

20:08:08 From Ninian Stuart : i have to head off - thanks SEDA folk

20:08:28 From David : Cheers Ninian...

20:08:30 From s halliday : SEDA , I think we can learn a lot from this grassroots linkages... We used to have an annual event called the group of groups.. ???

20:09:44 From kimstoddart : Thank you SEDA for inviting me to speak, and to my fellow speakers, Chris and David and to you all for the excellent questions. I have to leave now but this is great event, very inspiring and thought provoking. Thanks. Kim

20:09:45 From Glo Lo : WordCloud Q: What will be the most important issues in ecological design in the next 30 years? <https://www.menti.com/xdrfcfda1k>

20:10:13 From Andy Woodburn : Thanks to Chris and all the speakers!

20:10:16 From Liz McLean : <https://www.scottishcommunitiescan.org.uk/our-members/> link to SCCAN - Scottish Communities Climate Action Network

20:16:21 From Nick Domminney : Thanks to everybody and SEDA team

20:16:35 From Gail Halvorsen : Thanks all for another excellent set of talks. Definitely feel more positive after today!

20:17:45 From s halliday : please come tomorrow and contribute to the future.... of SEDA... x

20:17:49 From Plastic-Free Dunfermline : Thanks Chris and Team for having us along. Great to meet you all and hear other great talks.

20:18:24 From Liz McLean : Thanks Chris and everyone for another inspiring evening

20:18:51 From PETER WELSH : Another inspirational evening! Many thanks to everyone.
